Sales Collateral

DEUSA specializes in writing, designing and printing cost-effective sales material for the Telecom industry. With over 20 years marketing telecom services, and an extensive library of technology photos, DEUSA can create world-class materials to fit your budget.

Materials are designed here in Miami, nearby the show, and can be delivered directly to your booth, or shipped to your office.

We Put the World at Your Fingertips...

Technologies Inc.

Voice over Internet Protocol

8.5 x 11

Voice over Internet Protocol - is an end-to-end service offered to our customers through a partnership with us. Customers will depend on us as their single vendor for service including provisioning, billing, maintenance and support. Under FCS, we are accountable for the service and requires that the customer place an order with us for Administration and to be billed from both carriers. For one order in the US and we will arrange for local access to send the customer one bill for the service. In addition, we will contact for all provisioning, billing and maintenance process for customers.

Benefits:

- Speeds are available from 64k to T155M and ISDN
- Can easily serve as the backbone for most complex applications
- Supports traditional business applications such as data conferencing, voice and fax compression or bulk data transfer
