Discover The Next Frontier in Communications

ITEXPO is the world's largest and longest-running B2B communications and technology trade show yet it remains more relevant than ever! This conference in Miami features educational tracks on the issues and opportunities for users and providers of today's sophisticated technology solutions.

Throughout the four-day event, hundreds of industry thought leaders and true practitioners will share their insights on cloud, mobility, UC, security, WebRTC, IoT, big data, BYOD, virtualization, customer experience, enterprise & service provider solutions and more! You can attend a variety of educational workshops, engage with amazing speakers, and participate in informative sessions for communications technology users, experts and suppliers.

There are lots of exciting events collocated with this edition of ITEXPO:

- Asterisk World
- ChannelVision (CVx) Expo
- IoT Evolution Expo
- IoT Evolution Developers Conference
- M2M Evolution
- Software Telco Conference

As well as free training & workshops:

- Asterisk from Scratch
- Content Marketing Workshop
- Ingate's SIP Trunking, UC Communications & WebRTC Seminars
- Telecom Reseller Week

Thank you for committing your time and resources to join us. We are confident you will find the experience extremely worthwhile.

There are many activities taking place over the next few days. Please take a moment to review and use this directory as a guide to make sure you schedule what's most important to you. For times and locations, please seen the Agenda-At-A-Glance on pages 14-22.

Once again, I'm very pleased that you're here to experience and contribute. As always, please contact myself or let a member of the TMC team know what you think of the event. You'll see us around all week and you can also stop by the Registration Desk to give us your valued feedback. Enjoy!

ADVANTAGE

WHAT YOU CAN OFFER CLIENTS

Award-Winning Products and Competitive Pricing

- For MPLS, VoMPLS, SIP Trunking, DIA, Cloud PBX, Cloud Contact Center, Integrated Voice/Data and T1/PRI
- Multi-carrier and multi-network redundancy for maximum security and uptime

User-Friendly Billing

- One point of contact and one bill
- AireCare advanced billing reporting portal with 24/7 access

Extraordinary Service

- AireNMS 24/7 network monitoring service included FREE for customers on AireSpring-provided routers and gateways
- Personal attention and Premier Support Package with an escalation list that includes executive management all the way up to our CEO

WHAT AIRESPRING OFFERS YOU

Generous Commission Structure

- Evergreen commissions
- Agent focused – over 90% of sales come from the channel
- 13 years of dependable commissions from a profitable, debt-free provider

Sales and Administrative Support

- Dedicated channel managers help you close business
- Online access and tracking of customer data, orders, and commissions

Instant Quoting Tools

- Instant access to real-time price quotes, rate sheets, product collateral, and training presentations
- QuoteSpring™ online quoting tool provides instant quotes on demand, with full integration for all carriers, including AT&T

Our partner program is consistently voted one of the most rewarding programs for agents and VARs

Our lineup of award-winning products is backed up by online tools, premium customer care and value-added services to help you succeed in the competitive marketplace.

connexo

Carrier grade softswitch built in the cloud, for the cloud.

Ideal for companies that don't need the features and costs of a high-end class 4 & 5 switch

Quick setup: Create and manage your wholesale business in minutes with just a few clicks.

Autoprovisioning for your end users (reporting, payments, overall account management).

Big size reports for calls and accounting in seconds

Dashboard includes real time and daily statistics (costs, income, number of calls, etc)

Out of the box LCR support, works automagically for you.

Flexible way for setting up your plans and tariffs.

Routing as complex as you need, based on routing plans, categories, and tags.

Uses top-notch technologies: Erlang, RabbitMQ, ElasticSearch, and more.

Agile interface and ease of use, we want you to focus on your business and not on us.

No need to hire a unix or windows system administrator, we take care of everything.

FREE TRIAL FREE

Free Trial

To learn more about Connexo you are welcome to visit us at our booth # 428 during the IT EXPO EAST 2015.

Also, don't lose the opportunity to participate in our raffle for an IPHONE 6, following these simple steps:

1. Text the keyword "connexo" to the shortcode "70000" or register via Website from your mobile at "itexpo.connexo.net".

2. You will receive a response asking for your personal information, please reply to it with everything needed. That's it!

3. Make sure to be present at our booth # 428, on Friday, January 30th at 12:30 PM.

The winner will be announced on our Facebook Fan Page and Website. Good Luck!

Content Boost

FREE Content Marketing Workshop

Tuesday, January 27, 2015 - Room: B117

1:30pm	Internet of Things:Business Model Impact and WirelessNetwork Considerations
2:00pm	WebRTC: Technology & Applications
3:00pm	Present and Future Lync; Skype for Business

Featured Presenter: Gary Audin

Audin has more than 40 years of computer, communications and security consulting and implementation experience. He has planned, designed, specified, implemented, and operated data, LAN, WAN and telephone networks.

Sponsored By:

TelecomReseller UCNetworks

The Voice of Unified Communications and Collaboration

Successful SIP Trunking

If there is any theme in IT today, it is a flat or reduced the IT budget. One budget candidate is using SIP trunking and retiring the old T1 and PRI carrier connections. SIP trunking can in most cases produce enough savings to warrant the change. Although SIP trunks have around for years, they still have problems that you will learn about in this presentation. The proliferation of SIP trunking makes the bandwidth calculations for those SIP trunks an issue that the IT organization must resolve. Too much capacity and money is wasted. Too little capacity and calls will be blocked, callers will abandon the call, the enterprise agents will be less productive, and the enterprise's reputation for service may be harmed.

Internet of Things: Business Model Impact and Network Considerations

As the devices that will be Internet capable grows, so does the impact of all of these devices, an estimated 6 billion+, affect most manufacturers and service providers. This has fostered the Industrial Internet. The manufacturers will change their business model to one where services may be more profitable that the products they produce. Service providers, both wired and wireless, will have to accept that each Internet location may have dozens of Internet addresses that produce only modest amounts of traffic but will be continuously live. Wireless providers may have to add new charge structures so that low traffic devices can be always on. This session is designed to anticipate the changes that the Internet of Things

WebRTC: Technology and Applications

Web Real Time Communications (WebRTC) is an Applications Programming Interface (API) first introduced as open source code by Google in 2011. The goal for WebRTC is to build a standard-based real time media engine implemented in all of the available browsers. A browser with WebRTC and a web services application can direct the browser to establish a real time voice or video Real Time Protocol (RTP) connection to another WebRTC device or to a WebRTC media server. You will need platforms and servers to implement applications. The 1000s of use cases for WebRTC are wide ranging from customer service to health care to emergency notifications.

Lync Migration

Many enterprises have or are looking to implement Microsoft Lync. Or the enterprise may be upgrading from Office Communications Server (OCS) to Lync. No matter the path taken, Lync has its promoters and detractors who blog on the ease and difficulties of implementing a Lync system, software and services. Connecting Microsoft's Lync to SIP trunks and SIP qualified devices is a matter of interoperability. Both Microsoft and the SIP vendors/providers need to participate in a thorough structured test to validate their interoperability.

As a cutting-edge white label, HTTPS hosted fax service provider, FaxSIPit radically simplifies the way organizations use and connect fax solutions. Our Fax centric telephony network, with large capacity allows you scalability to accommodate growth, a special design that includes a robust and redundant architecture with load balancing and fail-over capabilities. We provide award-winning dedicated fax telephony connections, HTTPS based fax connections, fax machine connectivity, virtual, and SIP which are all VoIP complementing fax technology enabling companies to communicate and deliver information faster, smarter and easier in a secure and reliable manner.

Fiber Mountain, Inc. (Booth: 821)
www.fibermountain.com
P: 203-806-4040

Fiber Mountain™ is transforming network infrastructure through the Glass Core™ and Connectivity Virtualization™. Today's data centers face ever-increasing demands for more bandwidth and agility, and the Glass Core architecture combined with the Alpine Orchestration System™ brings new levels of intelligence to the network through direct packet delivery, dynamic discovery and software-controlled configuration of fiber optic lanes. This transformative technology enables seamless, high-speed connectivity management between switches, routers, servers and storage devices. Fiber Mountain dramatically increases network speed and efficiency, while reducing traditional data center expansion costs as well as capital and operating expenses. Its solutions significantly reduce power consumption, heat dissipation, space, maintenance costs and complexity. Removing many core and aggregation/spine switches simplifies the network. Fiber Mountain's offerings can co-exist and bolster existing infrastructure, taking the complexity out of network growth plans and making it easy for data center customers to deploy.

Flexera (Booth: 520)
www.flexerasoftware.com
P: 847-466-4000

Flexera Software helps network equipment providers increase application usage and the value they derive from their software. Our next-generation software licensing, compliance and installation solutions are essential to ensure continuous licensing compliance, optimized software investments and to future-proof businesses against the risks and costs of constantly changing technology.

robomq.io (Booth: 123, M2M Battle of The Platforms)
www.robomq.io
P/F: 954-385-7280 / 954-385-7280

Millions of devices, sensors and applications are creating the "Internet of Things". These devices and application vendors provide their own proprietary data integration to encourage quick adoption of their products. The multitude of devices, sensors and integration mechanisms is already creating silos of data. robomq.io platform solves these challenges by providing an industry standard Message Queue based integration hub supporting open standard protocols like MQTT (MQ for Telemetry), AMQP, STOMP and REST over HTTP with lightweight clients in multiple languages. robomq.io comes bundled with analytics, management capabilities, dashboards and monitoring & alerts. The platform is expandable and scalable allowing addition of new functionality and processes at a later date without affecting existing data integration flows.

RSM2M (Booth: 333)
www.power-line-carrier.com
P/F: 954-385-7280 / 954-385-7280

Sprint (Booth: Meeting Room 3)
www.sprint.com
P/F: 913-221-6912 / 913-221-6912

Sprint M2M Expertise Sprint is a global leader in machine-to-machine (M2M) technology which powers Usage Based Insurance solutions. Sprint has been recognized for overall customer satisfaction and for high performance in machine-to-machine (M2M) technology: Sprint is the first telecom company to deliver an "A+" Corporate Responsibility Report. (Global Reporting Initiative– Nov. 2012) Sprint was named as one of the most important and influential providers of machine-to-machine (M2M) services for the ninth consecutive year. (Connected World – Oct 2012) Sprint received the #1 machine-to-machine (M2M) scorecard ranking among North American based communication service providers—ranked #2 globally. (Analysys Mason – Nov. 2011) Network Award for Global Wholesale Excellence (ACM-Atlantic– Jan. 2012) Why do so many of the world's leading innovators turn to Sprint? Time and again, partners tell us that one of the main reasons they choose to work with Sprint is our shared passion for bringing new ideas to market. Sprint combines this passion with years of industry experience, an open architecture, and the broadest network portfolio in the industry which includes our 4G network. Over the past ten years, this devotion to technology has led us to build a solutions platform based on openness and collaboration. For you, that means completely open certification standards. It means a tailored solution that's optimal for you. In addition, it means access to aggregators, OEMs and hundreds of Sprint engineering, custom network and industry-specific specialists.

P: 954-449-4900

WHOA.com is a leader in next-generation, ISO 27001 Certified secure cloud solutions. We offer a comprehensive portfolio of best-in-class cloud services for business including Infrastructure as a Service (IaaS), Desktop as a Service (DaaS), Cloud Storage, Disaster Recovery, Integrated Applications and Security. The WHOA.com secure network of multiple top tier data centers is strategically located across the country, which prioritizes security, efficiency, and the reliable delivery of business-critical applications. By providing the industry's finest hardware and software coupled with unbeatable levels of high availability, connectivity, uptime and security, we represent the pinnacle of quality available in today's cloud infrastructure market.

Wilson Electronics (Booth: 210 M2M Pavilion)
www.wilsonelectronics.com
P/F: 800-204-4104 / 435-656-2432

Wilson Electronics, a leader in wireless communications for more than 40 years, designs and manufactures a wide variety of cellular signal boosters, antennas and related components that significantly improve voice and data communication in mobile, indoor, and machine-to-machine (M2M) applications.

Windstream/Allworx (Booth: 514)
www.windstreambusiness.com
P/F: 866-445-5882 / 585-340-2507

Windstream, a nationwide FORTUNE 500 and S&P 500 company and leading IT and communications provider offers a full suite of advanced technology solutions, including Unified Communications, managed services, cloud computing, disaster recovery, and networking services designed to help businesses increase productivity and improve operational efficiencies.

Work Market (Booth: 708)
www.workmarket.com
P/F: 877-654-9675 / 877-654-9675

Work Market is a cloud-based freelance management system (FMS) that helps businesses manage their independent contractor and freelance workforce. Work Market empowers businesses of all sizes to manage the end-to-end freelance workstream, all from one easy-to-use solution. Using Work Market, businesses can seamlessly find, manage and pay workers. Our intuitive analytics engine even lets companies uncover valuable business intelligence about everything from annual contractor spend and market coverage to assignment completion rate and resource effectiveness.

Xelex Technologies, Inc. (Booth: 830)
www.xelex.net
P/F: 585-317-3844 / 585-419-7028

Symphony is a carrier grade, stand alone, turnkey platform that enables Service Providers or Resellers to launch new Business Support Systems (BSS) applications and service offerings within their existing OSS. Billing, CRM, Mediation, Rating, Settlements, Workflow, Roaming, Provisioning, Top-Up, ETC.

XmarteK LLC (Booth: 333, A105)
www.xmartek.com
P/F: 954-385-7280 / 954-385-7280

Working with Market leaders from all over the world forging strategic international business relationships and distribution networks between technology solutions providers and vendors looking to extend their market reach. We serve as a global liaison between companies located within North America, Europe, Asia and Latin America. We understand Value Added Distribution. Visit our booth and learn about state of the art solutions in the fields of SBC (Session Border Controllers, IOT (Internet of Things, IUC (Industrial Unified Communications), Gateways Unified Communications (Lync Solutions). We work with Application developers, Service Providers, Industrial Domotics Solution Providers, VoIP Resellers. Master Distributors for Sangoma, snom, 2N, RSM2M, HiperPBX, Patton, 3CX, Yealink, among other Tier 1 vendors.

Xorcom (Booth: 406)
www.xorcom.com
P/F: +97249951999 / +97249951988

Xorcom, established in 2004, designs and manufactures integrated business telephony solutions that support both traditional PSTN and VoIP. All Xorcom products are based on an open source platform, making them easy to install and maintain as well as cost-effective. Seven product lines in the Xorcom IP-PBX family support from 30-1500 extensions, addressing the needs of SMB as well as enterprise. The flagship product, CompletePBX, is a fully integrated business telephony solution that provides excellent user experience, a robust feature set, and the cost-effectiveness of VoIP, with no per user license fees!

Yealink (Booth: 1000)
www.yealink.com
P/F: 86-592-5702000 / 86-592-570-2455

Yealink is the global TOP 3 SIP Phone Supplier in the IP communication industry where we design and manufacture innovative, high-quality, low-carbon IP phones. Our goal is to provide excellent technical solutions and matching customer support that helps clients located around the world to communicate freely and succeed in business. Since 2001, Yealink has continued to develop state-of-the art, hi-tech VoIP communication terminals that include IP video phones, IP phones and USB phones. With a worldwide market in more than 140 countries, the company has also established a first-class international service network. Our priorities are quality, functionality, ease-of-use, customer support and competitive pricing. To provide new solutions for the future in this fast-evolving sector, Yealink's large, talented and highly-experienced VoIP R&D team is totally committed to the pursuit of excellence. To date, we have passed more than 80 interoperability tests and meet certification requirements set by leading VoIP system and platforms. Yealink works in close partnership with T-Mobile, Telefonica, Portugal Telecom and other leading telecommunication service providers.

Yeastar (Booth: 508)
www.yeastar.com
P/F: 86-592-5503301 / 86-592-5503307

Yeastar specializes in the developing and manufacturing of IP-PBX, VoIP gateways, and IP video surveillance products and is committed to the distribution of new generation technology products in the field of enterprise communications. In the mean time, Yeastar provides the cost-efficient solutions for ITSP to develop the enterprises ultimate purchase market.

Zebra Technologies Corp (Booth: 201 M2M Pavilion)
www.zebra.com
P/F: 866-230-9494 / 847-913-8766

A global leader respected for innovation and reliability, Zebra Technologies Corporation offers technologies that give a virtual voice to an organization's assets, people and transactions, enabling organizations to unlock greater business value. Zebra's solutions support enterprise asset intelligence including Zatar, Zebra's enterprise Internet of Things (IoT) platform. Zatar allows easy connection and control of devices, empowering businesses to enable easy collaboration among workers, partners and customers.

ZYCOO (Booth: 435 Asterisk World Pavilion)
www.zycoo.com
P: 0086 28 85337096 806

ZYCOO is the leading developer of IP telephony devices and related systems, has devoted itself over the past years to researching and developing powerful and scalable voice over IP (VoIP) solutions, specifically for SMBs. VoIP transmits voice data via the Internet, as opposed to the public switched telephone network, thus making each individual call considerably less expensive. These savings add up quickly, which, as mentioned, can be a godsend for a small business. Combined with an extensive built-in feature list rivaling the biggest contact centers, VoIP can propel SMB growth to unforeseen heights.

Ayla Networks   (Booth: Battle of The Platforms)
www.aylanetworks.com
P/F: 408-830-9844 / 408-716-2621

Ayla Networks provides the industry's first Agile IoT Platform, accelerating development, support, and ongoing enhancements of connected products for the Internet of Things. Ayla's software fabric runs across devices, cloud, and apps to create secure connectivity, data analytics, and feature rich customer experiences. Offered as a cloud Platform-as-a-Service (PaaS), Ayla's flexibility and modularity enables rapid changes to practically any type of device, cloud, and app environment.

B&B SmartWorx   (Booth: 115)
www.bb-elec.com
P/F: 815-433-5100 / 815-433-5104

B&B Electronics is at the forefront of developing technologies for intelligent M2M - building smarter devices and enabling connectivity from the edge of the network to the cloud application layer. Our mission is to provide robust, scalable, flexible and secure connectivity hardware enabling solution providers to deploy M2M infrastructure with low risk and fast time to market. B&B Electronics has engineered and manufactured rugged, reliable, wired & wireless connectivity products since 1981. With an install base in excess of

3,000,000 wired, 500,000 wireless connections and 400,000 connected vehicles, B&B equipment continually enables millions of M2M solutions at the network edge.

B-Scada, Inc.   (Booth: 227)
www.scada.com
P/F: 352-564-9610 / 352-564-9611

B-Scada's HMI/SCADA software leverages the latest data acquisition and visualization technology to enable the automation and remote monitoring of connected devices. Solutions can be hosted locally or in the cloud. View your M2M data through compelling, highly functional interfaces on Windows, Web, or mobile devices.

CyberVision Inc   (Booth: Battle of The Platforms)
www.kaaproject.org
P/F: 201-585-9809 / 201-482-4539

For almost two decades in the software development business, CyberVision has implemented a large number of innovative solutions, with the recent ones being a mobile traffic management system, custom-tailored Big Data analytics systems, and our latest endeavor – Kaa, an open-source platform for building IoT ecosystems of connected devices.

Digi International   (Booth: Battle of The Platforms)
www.digi.com
P/F: 952-912-3444 / 952-912-4952

Digi International is your M2M and IoT solutions expert, combining products and services as end-to-end solutions to drive business efficiencies and transform customer service. Digi provides the industry's broadest range of wireless products, a device management and application enablement platform tailored for internet of things, and professional services to help customers get to market fast with wireless devices and applications.

Dog Hunter   (Booth: 220)
www.doghunter.org
P/F: 978-631-0369 / 480-393-5577

dog hunter LLC is a technology company bringing together the age of IOT (internet of things) combining open source software (Linux) and open source hardware (IP enhanced microchips). Building digital platforms and ecosystems made up of industry experts, strategic partners, consumer electronic manufacturers, industrial designers and manufacturers, IT retailers, system integrators and internet communications

Encore Networks   (Booth: 216)
www.encorenetworks.com
P/F: 703-318-4325 / 703-787-4625

Encore Networks is a leading designer and manufacturer of commercial enterprise and industrial hardened routers. Made in the USA, Encore's family of BANDIT™ and EN™ routers are designed for numerous Distributed Enterprise, Internet of Things and M2M applications including Business Continuity, Video Surveillance, Digital Signage and Remote Access. Encore's wireless routers support verticals such as First Responders, Point-of-Sale, Utilities, ATM's and Government.

Eurotech   (Booth: 114)
www.eurotech.com
P/F: 301-490-4007 / 301-490-4582

Eurotech solutions combine hardware, software, IoT/M2M middleware and device cloud services that drive business success. A global leader in connecting distributed devices that make up the Internet of Things, Eurotech collaborates with customers, partners, and integrators to bring rugged, reliable and cost effective device and data management solutions to market.

Geotab   (Booth: 221)
www.geotab.com
P: 647-729-3947

Geotab is a leading global M2M provider of premium quality, end-to-end telematics technology. Geotab's intuitive, full-featured solutions help businesses of all sizes better manage their drivers and vehicles by extracting accurate and actionable intelligence from real-time and historical trips data. Fortune 500 companies, including 40% of the top ten fleets and 18% of the top 100 fleets in North America, rely on Geotab's IoT solutions to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety, and achieve more accurate compliance to regulatory changes. The company's products are represented and sold worldwide through its Authorized Reseller network.

GetWireless   (Booth: 226)
www.getwirelessllc.com
P/F: 952-890-6669 / 952-882-7948

GetWireless is a national value-added distributor of 3G/4G cellular gateways and M2M solutions. We specialize in products, solutions and support for M2M communications by distributing equipment from industry-leading manufacturers including; Sierra Wireless AirLink, Option (CloudGate), Xirgo Technologies, Janus RC, and Antenna Plus.

ILS Technology   (Booth: 203, Battle of The Platforms)
www.ilstechnology.com
P/F: 561-982-9898 / 561-982-9898

ILS Technology, a Telit company, provides innovative M2M/IoT software and cloud services that directly link remote devices with enterprise systems, databases and web-based and mobile apps and dashboards - enabling deeper insights into operational performance and productivity. The deviceWISE Application Enablement Platform makes it easy to connect things to the Cloud and reduces the risk, time-to-market, complexity and cost of deploying solutions for remote monitoring and control, industrial automation, asset tracking and field service operations across virtually all industries and market segments around the world.

Inmarsat Global Limited   (Booth: 215)
www.inmarsat.com
P/F: 789-478-9748 / 207-728-1845

Inmarsat is the leading provider of global mobile satellite communications services. Since 1979, Inmarsat has been providing reliable voice and high-speed data communications to a diverse array of markets. Our M2M services allow business to remotely manage, monitor and control their assets wherever they are.

Iridium Communications LLC.   (Booth: 120)
www.iridium.com
P/F: 703-287-7423 / 703-287-7350

Iridium is the only mobile voice and data satellite communications network that spans the entire globe. Iridium enables connections between people, organizations and assets to and from anywhere, in real time. Together with its ever-expanding ecosystem of partner companies, Iridium delivers an innovative and rich portfolio of reliable solutions for markets that require truly global communications. The company has a major development program underway for its next-generation network — Iridium NEXT. Iridium Communications Inc. is headquartered in McLean, Va., U.S.A., and its common stock trades on the NASDAQ Global Select Market under the ticker symbol IRDM. For more information about Iridium products, services and partner solutions, visit www.iridium.com.

KORE Telematics   (Booth: 222, Meeting Room 2)
www.koretelematics.com
P/F: 678-389-3146 / 678-389-3147

KORE is the world's leading provider of machine-to-machine (M2M) network services - offering truly global connectivity over GSM, CDMA & Satellite technologies. We deliver network services to application solution providers and enterprises supported by a wireless operator grade, distributed and highly scalable business management platform that presents all network services and technologies through a single, unified interface.

Mformation Software Technologies LLC   (Booth: 121)
www.mformation.com
P/F: 732-692-6200 / 732-276-9897

Mformation Software Technologies LLC is the pioneer and leading global provider of mobility management solutions for wirelessly connected devices. Since 1999, Mformation's solutions have been deployed by the largest mobile operators and managed service providers worldwide. Mformation's award-winning technology provides solutions for M2M/IoT device management, mobile service enablement, smart customer interaction, automatic device detection and configuration, for carriers, MVNOs, system integrators, solution providers and device manufacturers.

Numerex   (Booth: 211, Battle of The Platforms)
www.numerex.com
P: 770-485-2520

Numerex® is an award-winning provider of interactive and on-demand machine-to-machine (M2M) enterprise solutions that enable the Internet of Things (IoT). Numerex delivers M2M solutions through integrated M2M horizontal platforms which are generally sold on a subscription basis. We provide hardware and smart devices, cellular and satellite network services, and software applications, what we refer to as Numerex DNA®. Numerex also provides business services that enable the development of efficient, reliable, and secure solutions while accelerating deployment. Numerex is ISO 27001 information security-certified, highlighting the Company's focus on M2M data security, service reliability and around-the-clock support of its customers' M2M solutions.

Opengear   (Booth: 228)
opengear.com
P/F: 888-346-6853 / 801-606-2798

Opengear is a leading provider of critical infrastructure management solutions delivering advanced console servers, remote management, monitoring, failover connectivity and cellular out-of-band products. Opengear Smart OOB™ management enables companies to access and manage mission critical systems and devices, remotely and securely from anywhere, even if the network is down, maximizing business continuity.

RACO Wireless   (Booth: Sponsor, A108)
www.racowireless.com
P/F: 800-509-3677 / 800-509-3677

RacoWireless (www.racowireless.com) is a leading provider of wireless data solutions to the machine-to-machine (M2M) industry. The company lives by its mantra to 'make it easy' by providing support for companies to build, manage and enhance wireless M2M applications.

robomq.io   (Booth: 123, Battle of The Platforms)
www.robomq.io
P: 571-338-2443

Millions of devices, sensors and applications are creating the "Internet of Things". These devices and application vendors provide their own proprietary data integration to encourage quick adoption of their products. The multitude of devices, sensors and integration mechanisms is already creating silos of data. robomq.io platform solves these challenges by providing an industry standard Message Queue based integration hub supporting open standard protocols like MQTT (MQ for Telemetry), AMQP, STOMP and REST over HTTP with lightweight clients in multiple languages. robomq.io comes

bundled with analytics, management capabilities, dashboards and monitoring & alerts. The platform is expandable and scalable allowing addition of new functionality and processes at a later date without affecting existing data integration flows. robomq.io platform has been benchmarked at 1 million message per second (or 86.4 billion messages per day) and can be scaled upwards.

Skkynet Cloud Systems (Booth: 214, Battle of The Platforms)
www.skkynet.com
P: 905-702-7851

Skkynet Cloud Systems, Inc. provides end-to-end solutions that integrate and distribute live data for industrial, embedded, and financial systems. Skkynet's solutions support machine-to-machine (M2M) connectivity, remote monitoring, supervisory control, and real-time analytics on virtually any SCADA system or embedded device, with no programming required. With Skkynet's Secure Cloud Service you can securely network your data to other locations, consolidate information from remote plants, share data for predictive maintenance, or use a web HMI to view data from around the globe. No new security hardware or VPN is needed. Your plant systems remain invisible to the Internet. Customers include Siemens, ABB, Honeywell, IBM, GE, Statoil, Goodyear, BASF, Cadbury Chocolate, and the Bank of Canada, to name a few.

Splunk   (Booth: 233)
www.splunk.com
P/F: 1-866-GET-SPLUNK / 415-869-3906

Splunk Inc. provides the leading platform for Operational Intelligence. Splunk® software searches, monitors, analyzes and visualizes machine-generated big data from websites, applications, servers, networks, sensors and mobile devices. More than 8,400 organizations use Splunk software to deepen business and customer understanding, mitigate cybersecurity risk, improve service performance and reduce costs.

Sprint   (Booth: Meeting Room 3)
www.sprint.com
P/F: 913-221-6912 / 913-221-6912

Sprint M2M Expertise Sprint is a global leader in machine-to-machine (M2M) technology which powers Usage Based Insurance solutions. Sprint has been recognized for overall customer satisfaction and for high performance in machine-to-machine (M2M) technology: Sprint is the first telecom company to deliver an "A+" Corporate Responsibility Report. (Global Reporting Initiative– Nov. 2012) Sprint was named as one of the most important and influential providers of machine-to-machine (M2M) services for the ninth consecutive year. (Connected World – Oct 2012)

Sprint received the #1 machine-to-machine (M2M) scorecard ranking among North American based communication service providers—ranked #2 globally. (Analysys Mason – Nov. 2011) Network Award for Global Wholesale Excellence (ACM-Atlantic– Jan. 2012) Why do so many of the world's leading innovators turn to Sprint? Time and again, partners tell us that one of the main reasons they choose to work with Sprint is our shared passion for bringing new ideas to market. Sprint combines this passion with years of industry experience, an open architecture, and the broadest network portfolio in the industry which includes our 4G network. Over the past ten years, this devotion to technology has led us to build a solutions platform based on openness and collaboration. For you, that means completely open certification standards. It means a tailored solution that's optimal for you. In addition, it means access to aggregators, OEMs and hundreds of Sprint engineering, custom network and industry-specific specialists.

Systech Corporaiton   (Booth: 208, Battle of The Platforms)
www.systech.com
P/F: 858-674-6500 / 858-613-2400

Systech Corporation is a leader in network conversion gateways, servers, and switches, supporting a wide variety of interfaces including Cellular, Ethernet, Wi-Fi, Analog Dial, Serial, Bluetooth, ZigBee, Z-Wave, and USB. Bringing connectivity to IP & non-IP based systems for ATM, point-of-sale, vending, electronic signage, building automation, security, and remote monitoring.

Telit Wireless Solutions   (Booth: 102)
www.telit.com
P/F: 919-439-7977 / 919-439-7977

With 12 years in m2m, Telit's ONE STOP. ONE SHOP. offers an extensive portfolio of quality cellular, short-range, and GNSS modules in 80+ countries, 35 sales offices, 60 distributors. From Telit Automotive Solutions come products for Automotive OEMs. Telit customers enjoy design investment protection from products that are scalable and interchangeable. From business unit m2mAIR, m2mAIR Mobile delivers value added services with superior performance, redundancy, and network coverage. m2mAIR Cloud offers PaaS application enablement and cloud back-end integration.

Thingworx, a PTC Business   (Booth: 209)
www.thingworx.com
P/F: 610-968-1500 / 610-968-1497

ThingWorx™, a PTC Business, provides the leading IoT application platform and development tools with the most advanced cloud-based service and software for managing connected products and machines. Combining ThingWorx and Axeda Machine Cloud™ technology allows companies to reduce application development efforts, minimizing cost, risk, complexity and time to market so they can quickly build and deploy Internet of Things (IoT) applications to optimize business processes and create new business models.

Verizon   (Booth: Meeting Room 1)
www.verizonenterprise.com
P/F: 800-721-1085 / 908-559-1234

Verizon Communications Inc. (NYSE, Nasdaq: VZ), headquartered in New York, is a global leader in delivering broadband and other wireless and wireline communications services to consumer, business, government and wholesale customers. Verizon Wireless operates America's most reliable wireless network, with more than 106 million retail connections nationwide. Verizon also provides converged communications, information and entertainment services over America's most advanced fiber-optic network, and delivers integrated business solutions to customers in more than 150 countries. By partnering with Verizon to develop and implement Connected Machines solutions, you can pursue all the potential benefits of the Internet of Things rather than deal with the complexities. Discover how Connected Machines solutions can help your business boom.

Vitria Technology, Inc.   (Booth: 108)
www.vitria.com
P/F: 408-212-2643 / 408-212-2720

Vitria provides the industry's leading streaming analytics software platform, empowering partners and customers alike to analyze streaming Big Data, complex events, and business processes in the proper context to take automated action. The result is faster, better decision-making. With a rich heritage as a technology pioneer, Vitria's award-winning streaming analytics platform provides the backbone for many Global 2000 companies' mission-critical business processes.

Vodafone   (Booth: 223)
m2m.vodafone.com
P: 650-517-2606

Vodafone Machine-to-Machine (M2M) connects previously isolated machines or devices to the internet, delivering new functionality and enhanced services without the need for human intervention. Supported by over 20 years' experience and 250 dedicated staff, Vodafone's global M2M platform makes it easy for global businesses to centrally manage M2M deployments across multiple territories, with greater control and at a lower cost than previously possible.

WebNMS   (Booth: 124, Battle of The Platforms)
www.webnms.com
P: 925-924-9500

WebNMS, the Internet of Things (IoT) and Telecom Network Management division of ZOHO Corp, provides an award-winning IoT Platform and industry specific IoT applications. With 18 years of market presence, WebNMS has over 25,000 deployments worldwide offering end-to-end, multi-vendor solutions in multiple domains such as Carrier Ethernet, MPLS, cable, wireless, satellite etc.

Wilson Electronics   (Booth: 210)
www.wilsonelectronics.com
P/F: 800-204-4104 / 435-656-2432

Wilson Electronics, a leader in wireless communications for more than 40 years, designs and manufactures a wide variety of cellular signal boosters, antennas and related components that significantly improve voice and data communication in mobile, indoor, and machine-to-machine (M2M) applications.

Zebra Technologies Corp   (Booth: 201)
www.zebra.com
P/F: 866-230-9494 / 847-913-8766

A global leader respected for innovation and reliability, Zebra Technologies Corporation offers technologies that give a virtual voice to an organization's assets, people and transactions, enabling organizations to unlock greater business value. Zebra's solutions support enterprise asset intelligence including Zatar, Zebra's enterprise Internet of Things (IoT) platform. Zatar allows easy connection and control of devices, empowering businesses to enable easy collaboration among workers, partners and customers.

FreePBX M3

MULTI MACHINE MANAGEMENT

Introducing M3, or Multi Machine Management, from Schmooze Com, Inc. M3 is a cloud based SaaS application that's simple to implement and scalable to fit the needs of both large and small organizations. M3 will provide you with painless metrics, monitoring and management directly from the M3 Cloud.

Schmooze provides the official support and development of the FreePBX EcoSystem, which now encompasses millions of systems worldwide. Over the years we have tested, experimented with and utilized various monitoring and management tools with the same results every time. These tools are very restrictive and unpleasant to configure as well as easily overwhelmed with a high number of clients and monitored services. Most importantly they were not easily implemented nor designed for the PBX environment. M3 is going to change all of that!

M3 will provide you with a professional management tool for managing groups and multiple installs of FreePBX or other compatible servers. Going beyond basic monitoring, M3 will provide organizations insight and management tools to deploy changes and updates before problems affect critical business processes.

FEATURES:

MONITORING AND ALERTING: M3 monitors your existing servers by an automatically deployed monitoring service with support for all Nagios plugins. M3 includes a modern dashboard for quick overview of various services, systems and events across your deployed servers as well as integrated alerts and notifications.

SERVER GROUPS, ROLES AND REMOTE MANAGEMENT: Easily create and deploy firewall rules and system upgrades to individual or groups of servers.

SECURE REMOTE CONNECTIONS: M3 provides an integrated VPN server for connectivity to the M3 Cloud and creating tunnels between grouped servers. M3 will also provide granular control for authentication and remote login to the GUI of your managed PBX instances.

SOUNDS GREAT, HOW DO I GIVE IT A TRY?

Initially M3 will be free for up to 2 monitored systems. You can open a sales ticket from the Schmooze Portal and request access to the FREE TRIAL of M3.

Asterisk World

January 27-30, 2015

The Event that is Everything Asterisk

Entering its fifth year, Asterisk World at ITEXPO is the conference that addresses "Everything Asterisk" for business users resellers and executive decision-makers. Come to Asterisk World to discover how Asterisk, the world's most widely used open source telephony software, can save you money and empower you to create more flexible telephony solutions.

- Examine real-life applications of cloud solutions that can enable you to sell more
- Get the inside track on battle-tested sales tips & tricks
- Learn how to prepare your enterprise for the future telecom distribution model
- Discuss new ways to use video

Asterisk World Room B-210

What is Asterisk World?

Asterisk, originally created and maintained by Digium, is the world's leading open source telephony engine and tool kit. Offering flexibility unheard of in the world of proprietary communications, Asterisk empowers developers and integrators to create advanced communication solutions...for free. The first ever Asterisk event focused purely on Asterisk for business, the Asterisk World Conference & Expo is "Everything Asterisk" for the business user, reseller, and executive decision maker.

Asterisk World is focused on Asterisk business users and potential users who are interested in getting more in depth experience with Asterisk, and who also want to learn more from Asterisk adopters and see what's happening in the Asterisk market. Asterisk World at ITEXPO is a pure-play IP conference, where decision makers will learn they have a cost effective and powerful choice. Asterisk World gives these audiences the opportunity to experience the global reach of Asterisk and the world class solutions which can solve traditional problems with new technologies and techniques.

Switchvox® Cloud from Digium®

The award-winning **Switchvox UC** business phone system. Now available in the cloud.

What's included in Switchvox Cloud?

Service features:

- Dedicated local number (DID) per extension
- Unlimited local and long-distance calling per extension
- Unlimited extension-to extension calling
- HD voice (where available)

General phone system features:

- Personalized Switchboard for every user
- Mobile device support
- Call queues
- Visual Voicemail
- Detailed reporting
- Conference calling
- IVR and Auto-attendant

Switchvox Cloud is based on Digium's award-winning Switchvox business phone system. Recognized as a powerful IP communications system, Switchvox is built for SMBs looking for enterprise-class features at an affordable price.

The same features and flexibility of the premises (on-site)-based Switchvox phone system are now available in Switchvox Cloud and are easily accessible to businesses with as few as five users or with hundreds of users.

With Switchvox Cloud you can have access to a business-class phone system while completely eliminating costly CapEx. Now you can add Digium phones to your monthly bill as opposed to exhausting capital up front with hardware. Switchvox Cloud makes it easy to get started with no upfront costs, hassle-free installation and no ongoing maintenance.

Digium, Inc **(Booth: 626)**
www.digium.com
P: 256-428-6000

Digium, Inc. provides Asterisk® software, telephony hardware, and hosted and on-premises Switchvox business phone systems that deliver enterprise-class Unified Communications (UC) and UC as a Service (UCaaS) solutions at an affordable price. Digium is the creator, primary developer, and sponsor of the Asterisk project, the world's most widely used open source communications software. Asterisk turns an ordinary computer into a feature-rich communications server. A community of more than 80,000 developers and users worldwide uses Asterisk to create VoIP communication solutions in more than 170 countries. Since 1999, Digium has empowered developers to create innovative communications solutions based on open standards and open source software, providing an alternative to proprietary phone systems. Digium Switchvox Cloud and other cloud-based products and services are offered through Digium Cloud Services, LLC, a wholly owned subsidiary of Digium, Inc. Digium's business communications products are sold through a worldwide network of reseller partners.

Elastix **(Booth: 526)**
www.elastix.com
P/F: 877-352-7849 / 877-352-7849

Elastix is an Open Source Unified Communications solution. It includes a Web GUI for easy configuration of the Asterisk server and all of its extensions and components. The licensing model promotes the software's free use and distribution, which allows a lower budget for the company's technology platform. In its multi-tenant version, it offers support for multiple companies managed from a single installation. Elastix not only provides telephony, it also integrates other communication tools to make the organization environment more productive and efficient.

OpenVox Communication Co., Ltd **(Booth: 429)**
www.openvox.cn
P/F: +86-755-82535461 / +86-755-83823074

Founded in 2002, OpenVox is one of the leading suppliers into open source market, driving innovative and highly cost-effective solutions for a better and closer VoIP connected world. OpenVox Communication Co Ltd dedicates its passion in supplying open source computer telephony hardware and software products. With excellent product quality and efficient technical and logistic service support, OpenVox have won good reputation over 90 countries worldwide, and have established a large and strong partner network with reliable distributors, resellers, system builders, and various software and hardware strategic partners. OpenVox products are ready to be used with leading open source telephony projects including Asterisk, trixbox, Elastix, PBX in a Flash, AskoziaPBX, Voyage-Linux in full product line with excellent performance and are being continuously extended with innovation. So far this year, OpenVox has developed abundant product lines, such as expanded VoxStack VoIP Gateway and United Communication Platform.

OrecX **(Booth: 732)**
www.orecx.com
P/F: 312-945-7622 / 312-945-7622

OrecX provides open source VoIP recording, Mobile Recording, Screen Recording, Quality Monitoring and customized workforce optimization solutions at a fraction of the cost of proprietary recording applications. Ranked highest among call recording companies on the 2013 Inc. 5000 list, our customers include Business VoIP Providers, Call Centers, Government Agencies, Small Businesses, and clients that need easy to install and maintain customizable solutions at a low cost of ownership.

OrecX is the primary developer and sponsor of the Oreka open source call recording project hosted on http://oreka.sourceforge.net/download/. More than 132,000 users have downloaded the open source version of OrecX (across 170-plus countries), which has received accolades from Linux World, Unified Communications Magazine, and TMC Magazine.

Schmooze Com Inc **(Booth: 627)**
www.schmoozecom.com
P/F: 920-886-8130 / 920-967-8726

Schmooze Com, Inc. is a global telephony software development company based in Neenah, Wisconsin. Schmooze's flagship product is FreePBX, the most widely deployed open source PBX platform in use across the world today with millions of active production systems. The open source development model provides growth and innovation in the FreePBX product, Schmooze provides simple ways to deploy communications systems effectively. Schmooze offers FreePBX Certified Hardware, Software, Professional Consulting, Certified Reseller and Training Programs and FreePBX integrated SIP trunking through the popular SIPStation.com VoIP service. In addition to FreePBX, Schmooze develops the PBXact turnkey premise and hosted PBX platform. FreePBX's solid growth is testament that Schmooze is successfully delivering world-class software, backed by fantastic customer service, all at a highly affordable price.

Telephony Depot **(Booth: 534)**
www.telephonydepot.com
P/F: 215-825-8700 / 215-825-8771

Telephony Depot has been providing hardware, software, service and support to the telephony industry for nearly a decade. We offer an extensive product catalog, high stocking levels and competitive prices, and we back it all up with remarkable customer service and exceptional pre- and post-sales technical guidance. We are proponents of Open Source & Open Standards, and our product portfolio is geared towards open telephony platforms such as Asterisk, FreeSwitch and many others. We owe our success to thousands of resellers worldwide who participate in our partner program, where we offer additional training, support and financial incentives. We are especially proud to introduce our "fax-friendly" SIP trunking service -- just ask us about Power-T.38.excellent customer service.

ZYCOO Co.,Ltd. **(Booth: 435)**
www.zycoo.com
P: 0086 28 85337096 806

ZYCOO is the leading developer of IP telephony devices and related systems, has devoted itself over the past years to researching and developing powerful and scalable voice over IP (VoIP) solutions, specifically for SMBs. VoIP transmits voice data via the Internet, as opposed to the public switched telephone network, thus making each individual call considerably less expensive. These savings add up quickly, which, as mentioned, can be a godsend for a small business. Combined with an extensive built-in feature list rivaling the biggest contact centers, VoIP can propel SMB growth to unforeseen heights. ZYCOO's current product line includes CooVox Series IP Phone system (ranging from a 2 port to a 24 port),UC Series IP Office for SOHO, P Series Hardware Appliance, and CooFone Series IP desk phones,all designed for the SMB environment;meanwhile there are related software developed to enrich the telephony solution like CTMS(Cloud Telephony Management System), CooBill billing system, etc. The company also offers many types of embedded hardware boards for original design manufacturers (ODM) looking to incorporate these devices into their own solutions and distribution offerings. Most importantly, all of these devices and services are offered at prices commensurate with the purchasing power of SMBs.
