Unified COMMUNICATIONS - Unified Communications Magazine

Launched in 1997

Dear Colleague,

Unified Communications magazine is devoted to educating enterprise decision makers on why and how they need to deploy unified communications (UC) solutions.

Enterprises are increasingly deploying today's UC solutions to:

- Improve employee productivity and transform the way people communicate.
- Integrate communications into business processes.
- Simplify operations by connecting people and information more efficiently.
- Reduce capital expenditures.

The market for unified communications software and the hardware that it runs on is experiencing tremendous growth. Today's enterprise workforce is demanding these productivity-enhancing options from their IT and telecom departments. Responding to this pressure from their staffs, decision makers at all levels are selecting and deploying solutions at a frantic pace.

Launched in 2009

Every issue of *Unified Communications* magazine features a comprehensive news section; case studies of successful deployments and lessons learned; interviews with leading hardware and software companies; and an 'industry' section, featuring analysis of important mergers and acquisition, partnerships and a Wall St. perspective on the unified communications market.

Unified Communications magazine presents targeted editorial that enables decision makers to make better purchasing decisions.

It is our goal to make the editorial environment of the magazine an essential read for the most important buyers in the market.

From TMC, Pioneers in Print and Web Publishing

Unified Communications magazine is published by TMC®, the company that launched the first magazine in the call center space in 1982, the first magazine in the VoIP space in 1998, and produces the most visited communications site in the world, TMCnet®.

Unified Communications magazine is the best place for serious decision makers to turn when wanting to learn what they should buy and why.

Sincerely,
Rich Tehrani
Group Editor-in-Chief

Why TMC? - Unified COMMUNICATIONS

First Issue: February 1998
100th Issue: October 2006

TMC has distinguished itself in the market as the ideal company to produce *Unified Communications* magazine. We have been publishing magazines in communications since 1982 and still publish the world's longest-running IP communications magazine, Internet Telephony®. This publication is regarded as the most authoritative voice in IP communications and has been educating service providers on how to build nextgeneration networks since 1998. In October 2006, TMC published the landmark 100th issue of Internet Telephony®.

In addition TMC produces the best-attended IP communications trade shows in the world — Internet Telephony Conference & EXPO East and West. We also produce the world's only Communications Developer event.

Our Web portal, TMCnet, is the most-visited site in communications and technology with as many as 3 million unique visitors and 30 million page views in a given month. In addition, the site's traffic ranks in the top 5,300 sites in the entire world*. No other communications site comes close, and we are ranked higher than many general technology sites as well.

TMC has been educating the world on cutting-edge communications solutions for the past decade, as long as these technologies have been around. We have written numerous articles, hosted numerous conferences focusing on these topics, and we realize the market now needs a source of information on the rapidly growing unified communications market. TMC is uniquely positioned to provide this voice.
