

# SIP Print Announces SIP Care

*SIP Print SIP Care – Managing the Network from the Outside-In*

*SIP Care Helps Control the Software & the Network For Delivery Of Perfect End User Quality*

Westlake Village, CA ([PRWEB](#)) February, 2011 -- SIP Print™, ([www.sipprint.com](http://www.sipprint.com)) creators of the first and only truly affordable SIP-based VoIP call recording platform, today announced the release of SIP Care™ with full functionality and robust feature set.. The SIP Print SIP Care appliance ensures greater flexibility and high performance for the monitor/management from the Cloud of IT environments.

SIP Care is a multi-faceted effort by SIP Print to accommodate the needs of hosting and Co-Lo vendors, customers, and channel partners to provide high performance network and device monitor/management across the spectrum of devices (single vendor – mixed vendor) and organizations, single site, multi-site, regional to international. Based on early response for this product, distributors, resellers and end-users alike recognize the increasing importance of SIP Care particular to their environment. SIP Print SIP Care enables resellers to add value within their vertical market and bring exceptionally strong value and peace-of-mind to end-users with mission critical network and network device monitor/management requirements.

"SIP Print's release of SIP Care grew out of increasing market demand in the marketplace – across a wide field of industries with strong network and device monitor/management requirements, such as financial services, legal, healthcare, retail, call center, and emergency services to name a few," said Don Palmer, CEO of SIP Print. "SIP Care is a quality solution that offers monitoring and management of the IT network and its devices for small organizations to large enterprises that need to account for and manage their network at anytime from anyplace."

## About SIP Print

SIP Print is redefining SIP/VoIP call recording with the industry's first and only affordable systems tailored to small and medium-sized businesses and now for large organizations. SIP Print appliances offer; easy installation, simple maintenance and operation, and scalability to support the expansion of high-growth organizations. SIP Print is compatible and easily integrated with the industry's leading pure SIP-based communications systems and supports leading hybrid VoIP systems as well. The company's affordable, one-of-a-kind SIP call recording systems are SIP 2.0-compliant and CALEA-compliant, and are available through distributors, resellers and OEMs worldwide. Now with SIP Print SIP Care, vendors can offer their customers network and network device monitor/management according to their needs.
