

# THE BEST CHOICE FOR UTILITY CONSTRUCTION AND NETWORK INSTALLATION

---

**In 1936 Ken Fishel founded the Fishel Company with strong values and a commitment to providing Customers a high quality job at a fair price. Today, Team Fishel has of over 1,400 Teammates who work together towards this same goal by leveraging their strengths and experience nationwide. Increasing productivity, attacking waste, celebrating the Customer, being Accident Free and developing Teammates that embody Fishelosophy is critical to our success. It is not only our culture, but also our way of life.**

## **MANAGED NETWORK SERVICES**

Our Managed Network Services Group provides construction management for feasibility studies, design, engineering, permitting, maintenance and emergency restoration. Within specific network segments or geographic areas, our experienced Program Managers will work with your network engineering and construction staff to provide proven solutions specifically designed to meet your professional resource needs.

## **ENGINEERING AND DESIGN**

Team Fishel has the technical skills and experience to deliver comprehensive surveying, right-of-way and permitting services. We have the expertise to identify, develop, and incorporate design solutions for the expanding broadband communications, power, and natural gas industries. We provide franchise acquisition for new service providers, base mapping, field and make-ready engineering, route verification, computer-aided design for pre-construction drawings, permitting, rights-of-way acquisition, pre-construction staking of the running line, and utility locating.

## **UTILITY CONSTRUCTION**

Across the country, Team Fishel's army of equipment and field seasoned Teammates are hard at work, providing safe, efficient construction in all kinds of climates and in all kinds of soil. Each and every day, we are providing utility potholing, open cut trenching, directional drilling and handhole / manhole placement. Once the infrastructure is in place, our Teammates proof the duct to verify the conduit route, place the cable, and redline the as-built drawings for future record.

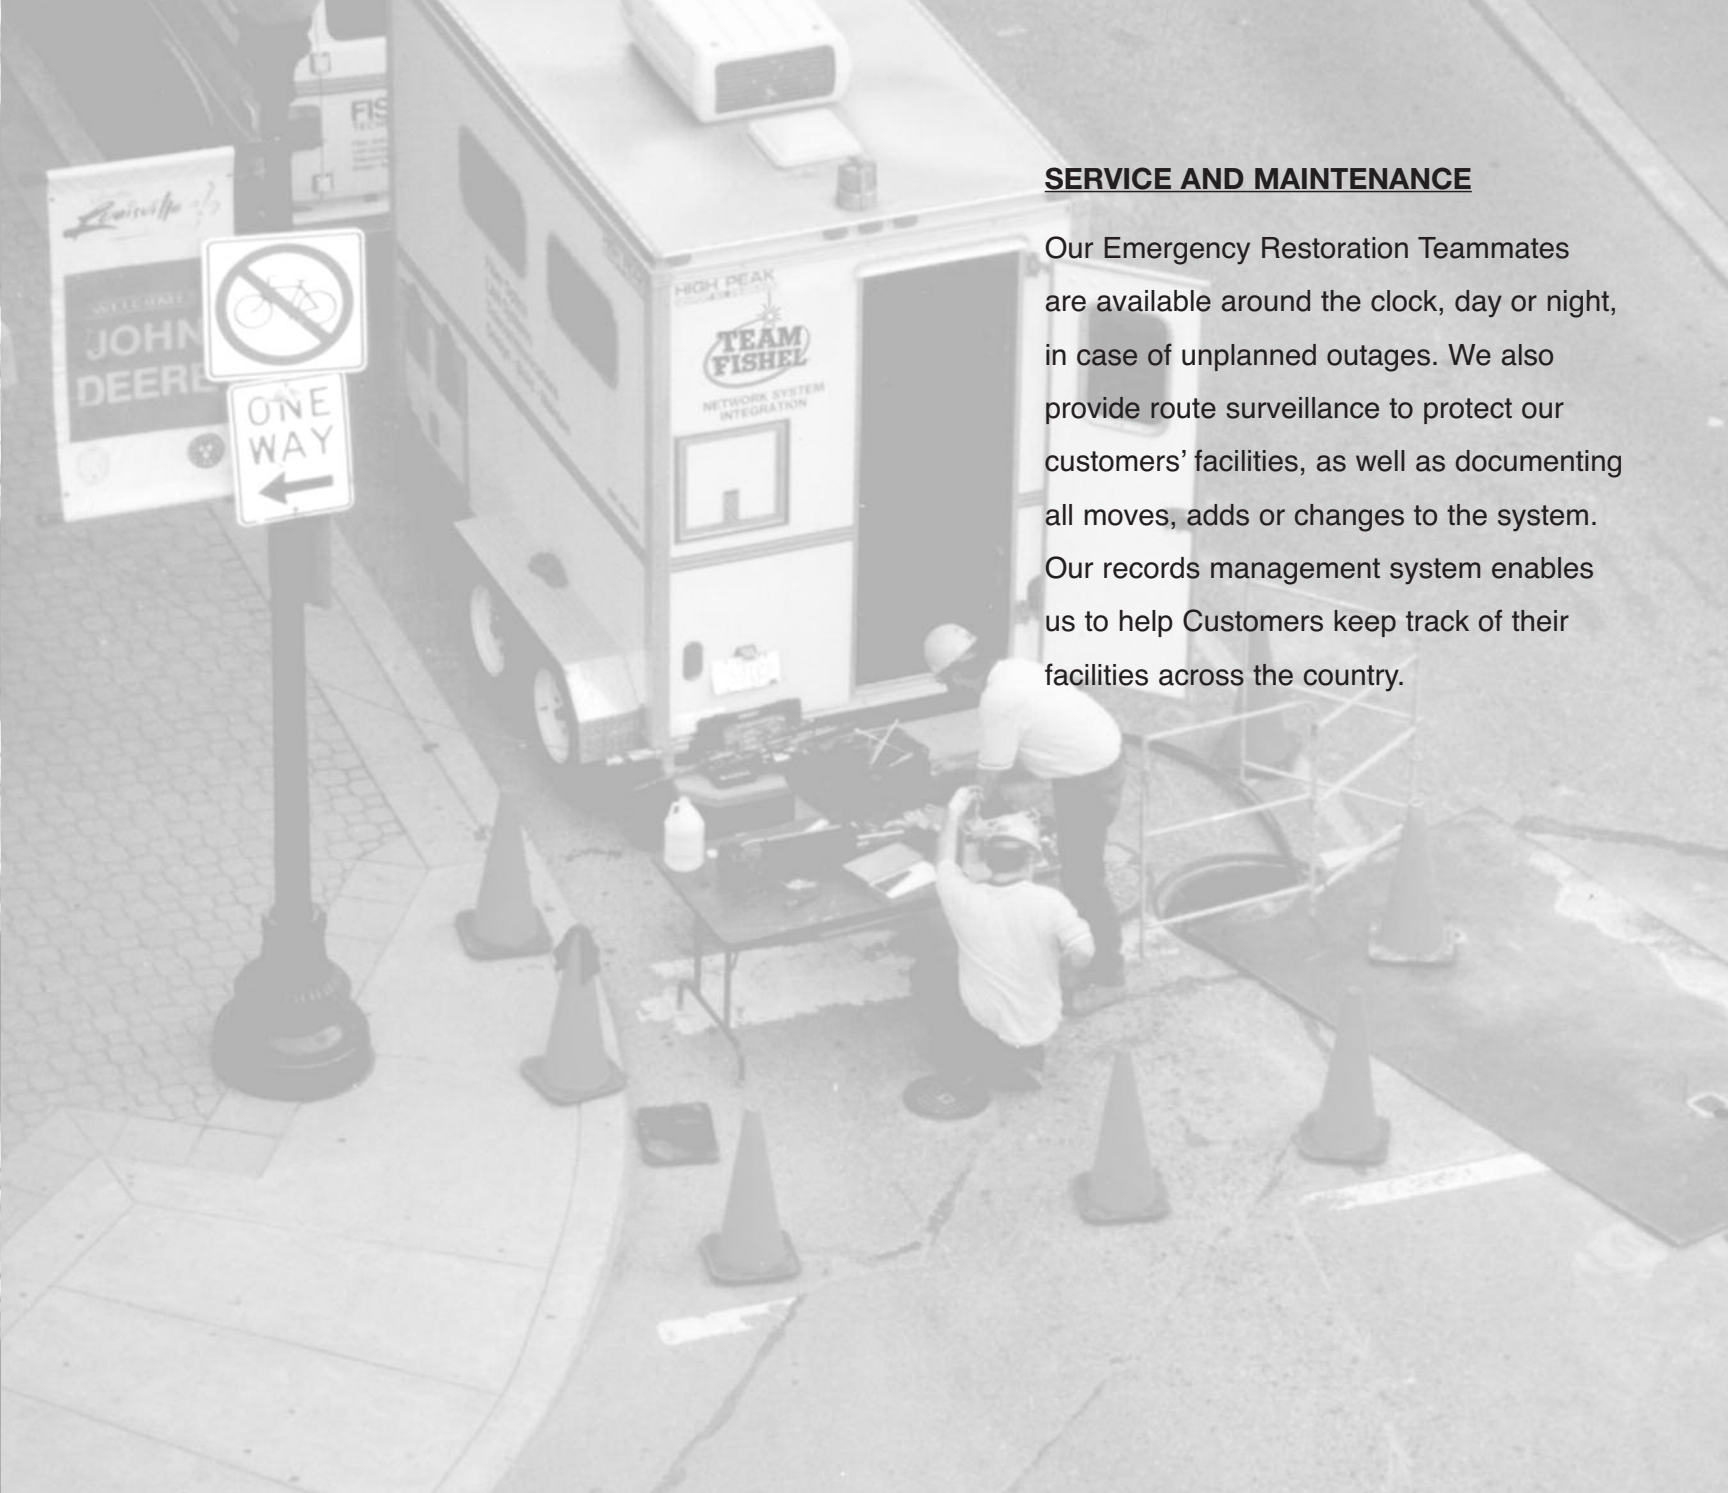

## **NETWORK INSTALLATION**

Team Fishel's Technologies Division specializes in the installation of copper and fiber optic systems for voice, video and data networks. Our BICSI Registered Communications Distribution Designers (RCDDs) can help design the network infrastructure for your company's needs today with the flexibility to meet the technological innovations of tomorrow. Our certified Technicians and experienced Installers are trained on the latest installation techniques in accordance with the EIA/TIA standards. We have the ability to certify both copper and fiber optic infrastructures for up to 25 years.

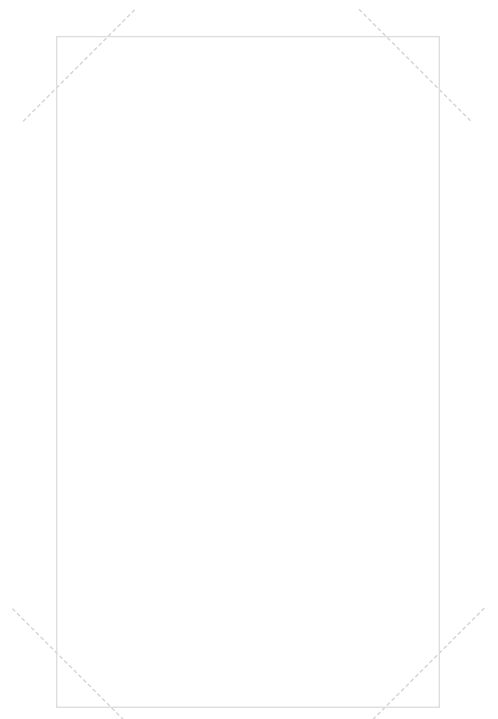

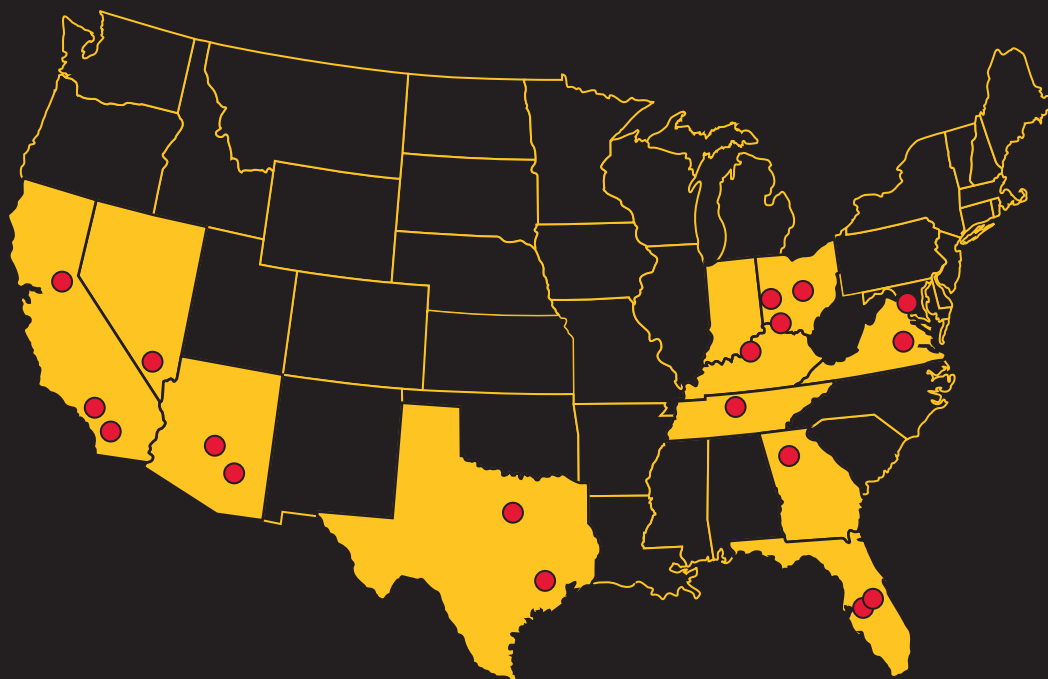

## **SERVICE AND MAINTENANCE**

Our Emergency Restoration Teammates are available around the clock, day or night, in case of unplanned outages. We also provide route surveillance to protect our customers' facilities, as well as documenting all moves, adds or changes to the system. Our records management system enables us to help Customers keep track of their facilities across the country.
