

TRM CONVERGENT TELECOM SERVICES

Inception → Integration

TRM is a dynamic small business providing deployment and integration services for convergent telecom and network infrastructure applications. Founded in 1994, **TRM** is seasoned in assisting a variety of clients in both commercial and public sectors with meeting their infrastructure needs and objectives. Our client-focused approach and dedicated professionals allow for built-in flexibility while maintaining efficient processes for resource optimization and budget attainment.

TRM is a technical general contractor offering a full array of development and deployment services focused on the infrastructure required for the convergence of IT, wireless, and wire-line networks. Our expertise in program management, site acquisition & construction as well as equipment installation, network integration and maintenance services offer our clients the scalability required for both small and large initiatives.

Key Components Include:

- Program & Project Management
- Project & Site Feasibility Analysis
- Site Acquisition, Entitlement & Zoning
- Cell Site Construction & Tower Erection
- Antenna & Line Installations
- Microwave Installation & Integration
- Structured cabling
- DAS & In-building Wireless Installations
- WAN/LAN & Optical LAN Installations
- Network Upgrades & Swap-outs
- Inside Plant / Outside Plant Installations
- Fiber Plant Installation & Integration
- Fiber Splicing & Terminations
