

Welcome to the world's most innovative fleet management solution

Powerful fleet management is no longer the domain of long haul big rig fleets. Fleets of all sizes and vehicle types have been discovering the powerful effects on fuel spend, efficiency, and safety that technology can bring to any fleet. With Xora InVehicle DL any organization can improve the way they manage their vehicles and drivers. Just plug in the device and go.

The innovative datalogger (DL) device is a small, self installed wireless communication device for monitoring and logging vehicle and driver performance..

Solution Overview

Xora InVehicle DL consists of a portable wireless GPS tracking device, a secure cloud-hosted management application that can be accessed from any web-browser and optional data exchange and integration with your other back office systems.

Key Benefits

- Increase the Productivity and Efficiency of your Fleet**
 Xora's industry leading management application gives you the ability to make better dispatch decisions, reduce fuel consumption and overtime, improve customer satisfaction, and get more work done.
- Fast and Easy Installation**
 The device can be self installed in your vehicles' existing OBD-II port in minutes. No training required. The unit draws power from the port, so no custom wiring is needed. Further, it's easily transferrable to another vehicle.
- Broad Compatibility across Vehicle Manufacturers**
 InVehicle DL supports all major manufacturers including GM, Ford, Chrysler, Honda, Toyota, Nissan, BMW, Audi, Volvo and more. Any small to medium sized truck, van, or car built after 1996 can use it.
- Increased Affordability through Innovation**
 Because of the innovative, portable design of the InVehicle DL wireless device, the solution is nearly 60% less expensive than solutions using traditional devices, and no installation costs.

Data Exchange and Integration

Connect the valuable information collected and managed by Xora InVehicle DL to your back office systems and other business applications with easy data exchange options.

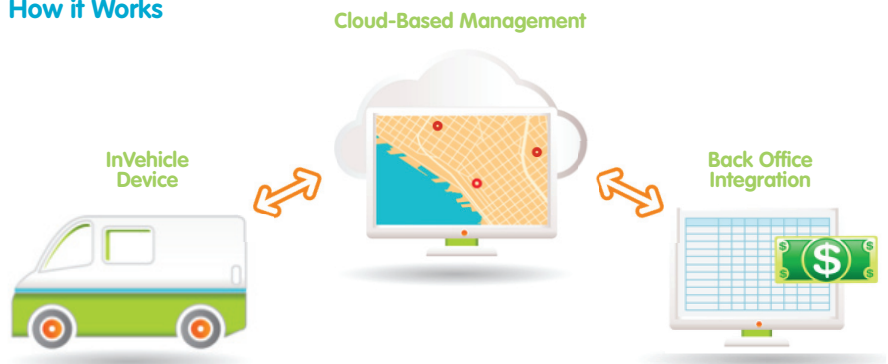

On-Demand Integrated Support

Xora makes it easy for you to get expert help if you have a question about any of our solutions. Our Support Center offers helpful documentation or you can speak directly to a product expert, 24 x 7.

How it Works

Mobile Employees:
Devices in vehicle automatically collect and report data to in-house staff.

Operations and Dispatch:
Access real-time and historical information to monitor and optimize fleet operations.

Business & Finance:
Exchange or connect to data to automate processes and analyze trends.

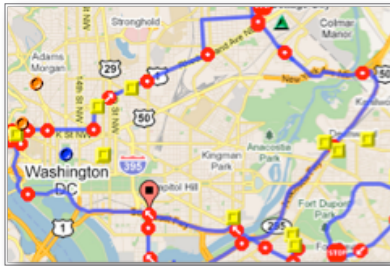

Features and Benefits

Stoplight	Name	Status
	Fozz	Logged In
	John	Logged In
	Chuck	Logged Off

Get a summary of the status of your mobile employees.

View a map with a breadcrumb trail of vehicle activities, including direction and stops.

Easily define certain areas with a geofence and track when vehicles enter or exit.

Alerts List	
<input type="checkbox"/> Name	Description
<input type="checkbox"/> Long Stop Alert	Alert that notifies on worker
<input type="checkbox"/> Prohibited Stop Alert	Alert that notifies when work Locations with the Prohibited
<input type="checkbox"/> Speeding Alert	Alert that notifies when work

Be alerted on a wide variety of vehicle conditions, including speed, stop, or idle time.

Gain near real-time visibility into the location of your vehicles and drivers

- See vehicle status, current location on maps or lists, and total hours on the road so you'll always have a complete view of your fleet operations
- Upload any number of locations for automatic detection of vehicles arriving at known or unknown locations
- Monitor the time it takes your drivers to travel between job locations and how much time they spend at each
- Easily create geofences to keep you informed when vehicles enter or leave certain geographic areas

Improve service levels by accurately communicating vehicle status

- Keep customers informed of driver arrival times with near real time GPS locations and status information for each vehicle
- Speed customer response times by dispatching the closest driver to fill incoming job requests

Get instant alerts on vehicle conditions that require immediate attention

- Define alerts based a broad range of criteria to meet your needs, including:
 - Vehicle activity – start/stop travel, ignition on/off, idle times
 - GPS activity – speeding, enter/exit specific regions, change direction
- Specify any list of individuals who should be notified for each particular alert, including the employee who triggers the alert
- Evaluate driver track record for triggering alerts to correct or reward behavior as needed

Create powerful reports to help assess operational performance of your fleet

- Choose from over 30 pre-configured reports or create your own on-demand
- Analyze historical data to assess and improve vehicle efficiency and service satisfaction levels
- Export reports into spreadsheets that can be easily imported into other back office systems to assess sales productivity, job costing, merchandizing effectiveness, expense management

Generate ROI quickly with cloud-based deployment and easy administration

- Get faster time to value with cloud-based deployment that minimizes overhead and gives you flexibility to grow
- Specify different access profiles so you can control who sees what information in your organization

Xora is the global leader in GPS enterprise mobile applications for location, time and job tracking for use on mobile devices and in vehicles. Find out more at www.xora.com.
