Our technologies ensure that

Life Is n

everywhere, for everyone,
at every moment.

Energy is the base of life, so we help to
ensure that energy is:

- Safe
- Reliable
- Efficient
- Connected
- Sustainable

Efficiency gains will come from IT/OT convergence

Asset related use cases are the logical first choice

What are the top IIoT use cases your company will start pursuing in the next year?

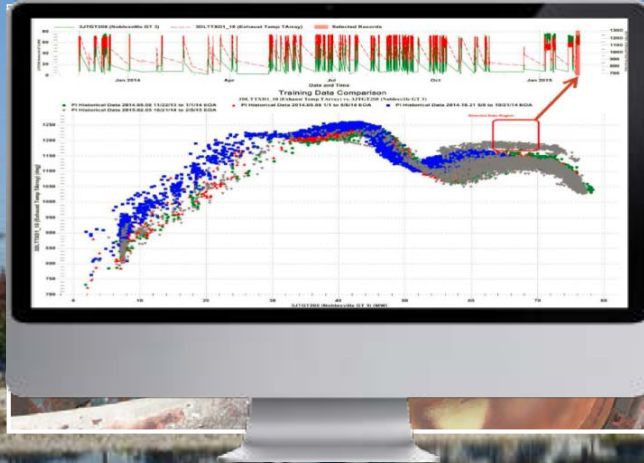

(N=249, all respondents)

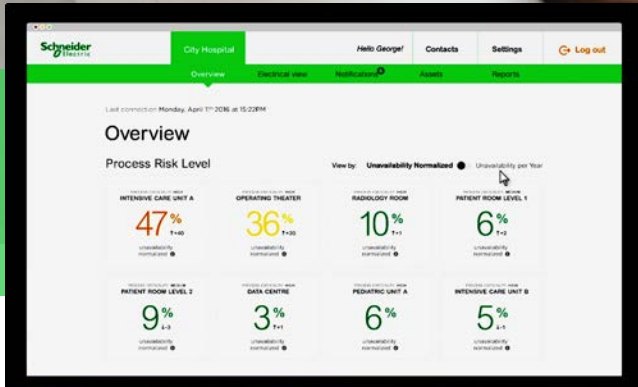

LNS IIOT Research Study - 2017

Predictive analytics delivers savings for energy utilities

Thanks to predictive modeling and scheduled maintenance of combustion turbines Duke Energy saved almost \$500k

Asset Performance Management as a Service ensures power availability

APMaS is a service that helps customers secure their installations with the monitoring of critical Electrical Assets (Schneider Electric and Third parties) performed by experts in Service Bureau and advanced analytics

PEOPLE

- Keep people safe
- Make people more productive
- Enable smarter decisions

Mobile control applications increase situational awareness

“The ability for our engineers and operators to use tablets and smart phones for controlling city services has greatly increased situational awareness and allowed us to become more efficient.”

Darren Schulz, Deputy Public Works Director Carson City, Nevada

WonderWare™ In Touch™,
Historian, SmartGlance™

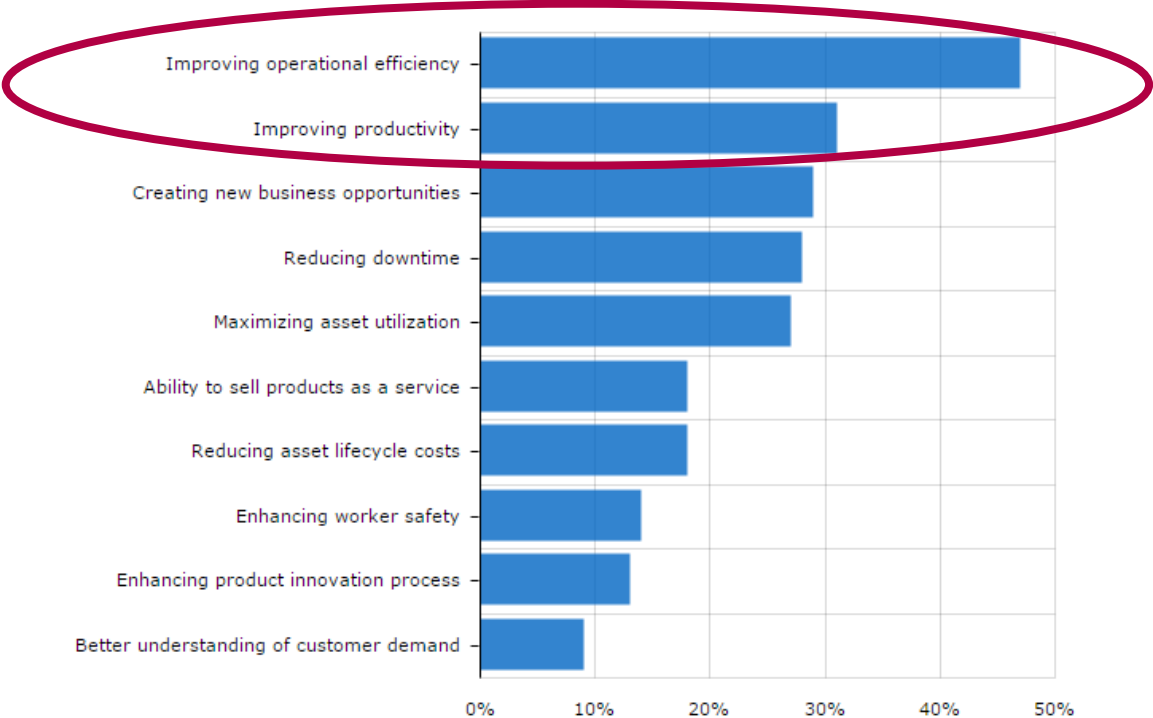

OPERATIONS

- Process control
- Supply chain
- Telemetry

Life Is On

Schneider

Efficient & productive operations are major drivers of IIoT adoption

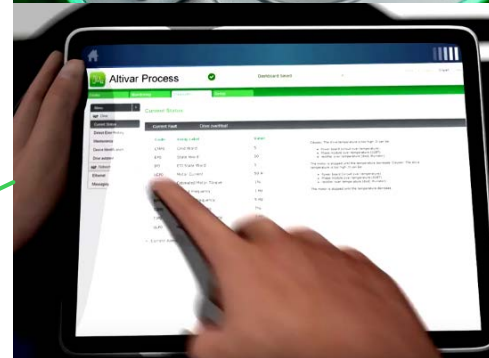

2015 survey of about 200 automation executives conducted by Morgan Stanley and *Automation World* magazine

1st ever connected variable speed drive built for process control

Altivar™ variable speed drives

Remote access and QR codes for servicing

Pumping and conveying operations

Traceability app monitors milk quality from collection to the plant

Instrumentation and Sensors for Temp, Acidity, and more...

Bulk Milk Cooler

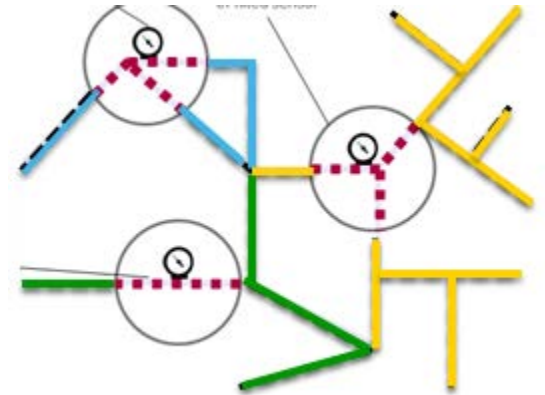

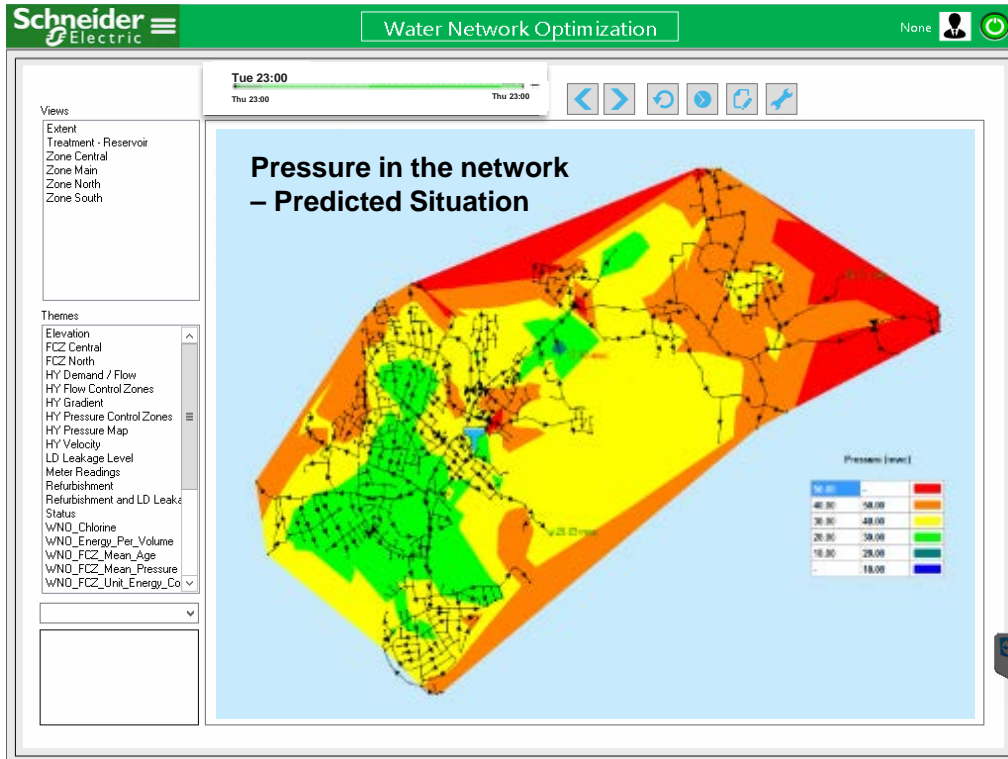

Milk Tanker Truck

Dairy Plant Receiving

Water network optimization software predicts and prevents shortages

The image shows several oil pumpjacks in silhouette against a clear blue sky. The pumpjacks are arranged in a line, receding into the distance. The lighting is bright, creating a high-contrast scene where the dark shapes of the machinery stand out against the light sky. The overall mood is industrial and modern.

Industrial operations leveraging IoT need infrastructure for
EDGE COMPUTING

Pre-fabricated data center in an industrial enclosure

FACILITIES

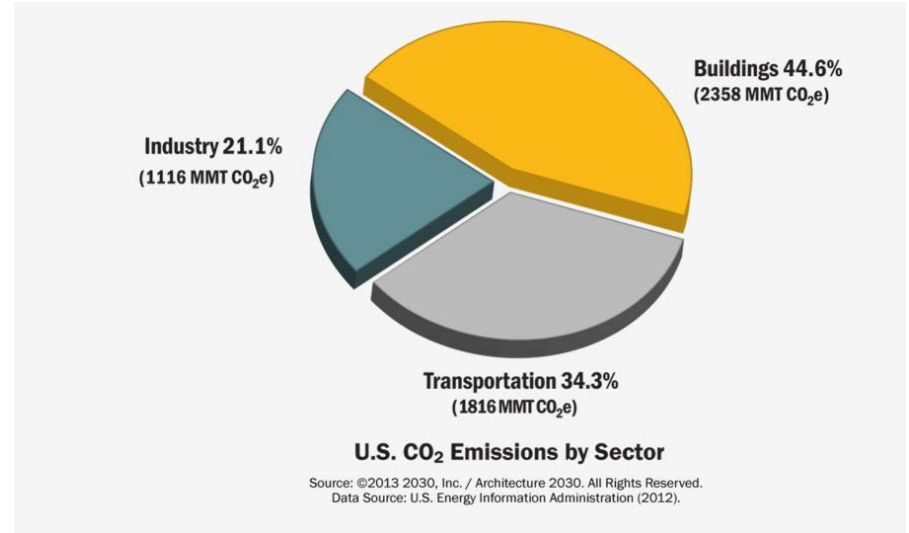

- Building efficiency
- Building sustainability
- Space utilization

Life Is On

Schneider

Did you know....

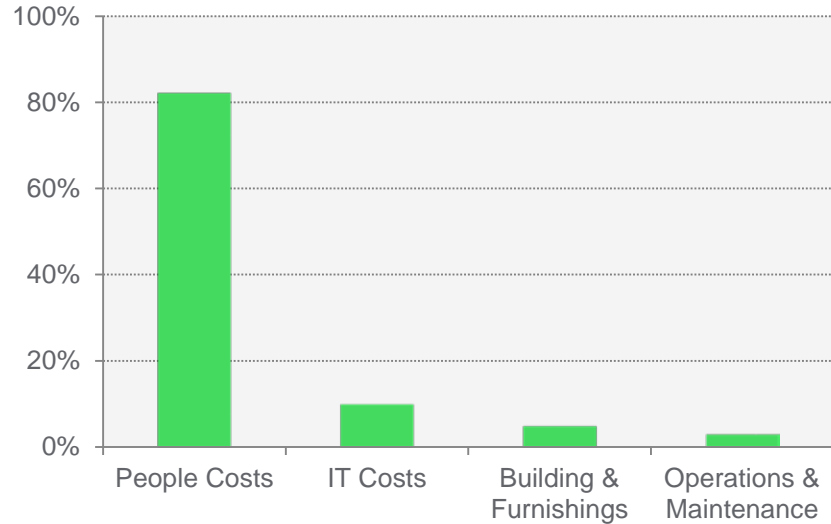

Buildings consume the most energy and create the most CO2 emissions

At the same time, businesses are challenged to increase profitability and worker productivity

- People costs can be **10 – 40 times the maintenance and operation costs** over the lifetime of a building
- Even **small increases in staff efficiency can have a huge impact** on business than just reducing costs

Average Annual Enterprise Costs

Source: CABA Intelligent & Integrated Buildings Council (IIBC), CABA White Paper, Improving Organizational Productivity with Building Automation Systems, page 7, 2014.

Advancing Building Control and Automation increases efficiency, comfort, and space management

Building Management System

Metering, Monitoring, Analysis and Management of Electrical, HVAC, Lighting, Blinds, and Safety.

Workplace Efficiency Services

Employee badges with RFID sensors transmit people location data to an automation server in the cloud

Visitors and employees can connect to a “service portal” enabling **control of lighting, temperature, and blinds**

The world's most sustainable office building

ERIK UBELS
Chief Information Officer, Deloitte Netherlands
My name is Erik Ubels. I have been the CIO for Deloitte for 23 years.

“ Schneider Electric is the single backbone so we can connect everything and also get the building data into a data analysis platform. ” *Erik Ubels, CIO*
Deloitte Netherlands
