Next Generation Networks

The New Magazine for Service Providers Building Tomorrow's Communications Networks

NGNMAG.COM

Introducing Next Generation Networks (NGN) Magazine

To Reach Key Decision Makers Investing in Next Generation Technology Products, Applications and Services, Include NGN Magazine in Your Media Plans

- How do service providers select the best technologies?
- How can they cost-effectively deploy services and applications to a rapidly-changing array of devices?
- In today's competitive marketplace, how do they meet and exceed customers' ever-higher expectations?

NGN magazine answers these important questions and more. To better serve communications service providers, TMC's newest publication is an evolution of IMS Magazine. It addresses a host of issues relevant to carriers looking to gain market share while maximizing ROI. Its premiere issue in January 2009 will raise the bar for the communication industry. NGN will be the font of expertise for providers using cable, VoIP and converged networks, and those migrating from legacy technologies to 4G.

The rapid influx of applications, as well as the potential for breaking into new and under-served territories, present great opportunities for today's service providers to profit - but only if smoothly deployed and wisely selected. NGN will provide the strategies and detailed content to enable service providers to proceed with confidence.

Credible, Unbiased Editorial

- Featured Articles Bringing Winning Strategies
- Columns by Recognized Experts/Analysts
- Industry and Regulatory News, Plus Coverage of Important Events

These are the highly credible editorial backdrop for your marketing messages. All of this is brought in bi-monthly issues by the veteran editorial team of Technology Marketing Corporation (TMC). For over 26 years, TMC has been serving communications technology professionals, leading the way through technological evolutions.

Experienced Editorial Team

NGN Magazine Features The Voices You Have Come to Rely on For Communications and Technology News, Opinions, and Product Information

Rich Tehrani, currently president and group editor-in-chief, has led TMC® in many capacities since 1982. Rich is an IP Communications industry expert, visionary, author and columnist. He founded *INTERNET TELEPHONY*® magazine in 1998 and, as President of TMC, is the owner of the registered trademark for the term Internet Telephony. In 1999, Tehrani launched *INTERNET TELEPHONY* Conference & EXPO and has watched it grow into the world's best attended IP communications trade show. Tehrani is also the founder of TMCnet, the most popular communications/technology portal in the world.

A well-respected voice of the communications industry, Tehrani has served as an expert witness and been quoted frequently in such prestigious publications as the Economist and New York Times.

Rich is a computer engineer who graduated from the University of Connecticut with a hardware/software Bachelor of Science degree. **24 Years' Industry Experience.**

Greg Galitzine, Group Editorial Director for TMC's IP Communications Group, including TMCnet, *INTERNET TELEPHONY* magazine, Customer Interaction Solutions magazine, NGN Magazine, and Unified Communications Magazine. Greg is the founding editor of *INTERNET TELEPHONY* and has overseen the publication's editorial direction since 1998. He is also the founding editor of *Unified Communications* magazine and *NGN* magazine. Prior to the launch of *INTERNET TELEPHONY*, Galitzine was Managing Editor at *CTI*® magazine and Chief Copy Editor at NASA Tech Briefs.

12 Years' Industry Experience.

Richard Grigonis, Executive Editor of TMC's IP Communications Group

Richard is an internationally-known technology editor and writer. He served as Editor-in-Chief of VON Magazine from its founding in 2003 until 2006. Prior to that, Grigonis spent nearly ten years as the Chief Technical Editor of CMP Media's Computer Telephony magazine. The author of five books on computers and telecom, Grigonis, who has written published articles in Dr. Dobb's Journal, TELECONNECT and Call Center magazines, also helped design and construct a testing lab used by four CMP publications.

15 Years' Industry Experience.

Tom Keating, CTO & Executive Technology Editor

Tom is executive technology editor for TMC® Labs, the industry's most-well known and respected testing lab, and has written hundreds of unbiased and objective reviews covering many technologies. He holds a bachelor's degree in computer science and engineering from the University of Connecticut.

14 Years' Industry Experience.

Gary Kim, Contributing Editor

Mr. Kim has been a journalist and industry analyst since 1983. Gary has been an independent consultant and has worked in the ISP and system integrator industry. He also was on the board of InternetNow, a Phoenix-based dial-up ISP.

Peter Radizeski, Contributing Editor

Mr. Radizeski is an agent for about 20 carriers, as well as a consultant for service providers (ISP, WISP, CLEC, MSO, FTTH, and ITSP) on strategy, marketing, messaging, and sales training. He is also a frequent blogger on TMCnet.

NGN's Focused Circulation

NGN magazine reaches only those professionals in the position to make, recommend, or influence purchase decisions. To providers of services, applications and products for those deploying next-generation networks, this means we take the guesswork out of reaching your prime prospects. NGN will reach potential buyers when they are ready to make RFPs, now and in the near future.

We want to partner with you to help you thrive and prosper. NGN is vital reading for C-Level and IT executives at carriers, cable service operators, ISPs, Value Added Service Providers and others delivering wireless services. With continual updates of our subscriber base, TMC does not waste resources, time, paper and postage on marginal readers. Just as we deliver premium editorial, we deliver top-level readership to advertisers.

NGN magazine reaches nearly 47,000 professionals with buying power: high-placed technical executives, C-level management, and other management. The readership comes from network service providers: ILECs and CLECs; Wireless and ISPs; independent telcos; Satellite, Cable and MSO providers; Rural telcos; competitive access providers.
